

# ALPHA HEAVY DUTY Commercial Fuel Pump

Back lit LCD display with an electronic meter calibration facility via the display

OPTION:  
Dual/second  
sided display

OPTION:  
Front, left or right  
handed nozzle  
holster

OPTION:  
Automatic nozzle

Stainless  
steel cabinet

Removable  
side panel

Steel braided  
hose 3.66m

OPTION: Base drip tray

External base mounting holes

The **HYTEK ALPHA** pump range is now ATEX approved for pumping diesel. The CLP regulations revised the flash point of diesel & this means that diesel has been reclassified to be treated as a flammable liquid.

The **ALPHA** heavy duty fuel pump has a modern robust stainless steel cabinet. Available in three versions, economy, standard & high speed. All models are fully electronic so there are no levers, switches or knobs to worry about!

**Pumping Speed:** Choose 50L/min version for filling cars & vans, 70L/min for filling trucks & 90L/min for filling vehicles with larger fuel tanks, coaches, buses & articulated trucks.

**Accuracy:** Diesel versions are accurate to +/- 0.25%.

**Display:** Single sided electronic display shows up to 99,999.9 litres, the electronic totaliser keeps an ongoing total of fuel used up to 99,999,999 litres. Dual sided display optional.

**Nozzle Operated:** No switches, levers or handles to operate or break. Simply remove the nozzle & the pump starts, replace & the pump stops. Next time you remove the nozzle the display resets.  
**(Nozzles not included, choose the make you prefer).**

**Key/Card System Interface:** All versions can easily be interfaced with most existing or new key/card fuel management systems as a 10:1/100:1 pulse transmitter is fitted as standard.

**Cabinet:** Modern robust cabinet, completely stainless steel to prevent corrosion. Individual parts can be replaced in the unfortunate event of accident damage.

**Easy to Maintain:** Good access for service engineers allows for easy & quick maintenance.  
(Speak to your distributor for maintenance schedule/contract)

**Supplied With:** Outlet hose & suction inlet flexible connector.

**Compatibility:** Use to dispense diesel.

**Options:** Automatic shut off nozzles, breakaway couplings & hose retractors. Ask for full list.

**FOR USE ON BELOW OR ABOVE GROUND STORAGE TANKS. NOT CURRENTLY SUITABLE FOR RESALE OR FOR USE WITH PETROL.**
