TIMEPLAN
PART OF THE TRISCAN GROUP

FUEL MANAGEMENT SYSTEMS
SIGMA 750

The Sigma 750 fuel management hardware is ideal for stand-alone or smaller networks and can be scaled up for more complex, multi-site operations. It has an established and well-proven design, to secure your on-site fuel dispensers. The Sigma 750 works seamlessly with Timeplan's web-based Fuel Manager portal to record and report fuelling activity.

Benefits

- 24 hour unmanned fuelling
- High security RFID vehicle and optional driver tags "SigmaTag"
- Alphanumeric keypad facilitates optional fleet code entries
- Wireless connection option
- Connection to mechanical and basic electronic commercial pumps

PART OF **THE TRISCAN GROUP**

How does it work?

The high security read-write tags programmed with vehicle details provide secure access to on-site fuel dispensers. Permitting simultaneous operation of multiple pumps, the transaction information is stored for later wireless upload to a centre web server.

Tags are programmed via desktop unit providing tactile control of authorised vehicles and drivers.

Products

Sigma 750

Key Specs

- Wireless connectivity to web-based control
- Simple yet powerful fixed web-based reports
- Controls up to 4 pumps simultaneously

Sigma 750 Bustag

Key Specs

- Built to the same spec as the Sigma 750
- Remote Vehicle Handset for high-speed fleet fuelling

Each transaction typically consists of:

- Date
- Time
- Fuel Grade
- Quality
- Cost
- Vehicle ID
- Odometer

Optional data that can be recorded:

- Driver ID
- Fleet Number/Reference entry

Key Features

- High security read write tag "Sigma Tag"
- Dual tag mode, providing driver accountability
- 3G Wireless reporting via web browser portal
- Basic tank gauge connection for stock reconciliation
- Range of mounting methods
- Alphanumeric keypad for reference entry
