

ADBLUE SOLUTIONS

PUMPS, TANKS AND FUEL MONITORING SOLUTIONS

We supply an extensive range of AdBlue pumps, tanks and fuel monitoring solutions to all transport sectors.

All of our equipment is premium quality, and has been designed to meet the requirements of those needing to comply with the new emission standards for heavy duty diesel engines.

Benefits

- 24 hour unattended vehicle refuelling
- View vehicle odometer readings for accurate MPG figures
- Ability to deny access to unauthorised drivers/vehicles
- Advanced usage, exception and environmental reporting
- Communicates fuel usage information for single or multiple sites back to one central point

"Triscan installed a 2,500 L Plastic Bunded AdBlue Tank and 35 L/min AdBlue Pump with 5m hose and auto shut off nozzle and holster. Throughout the entire project implementation, the Triscan team remained motivated, professional and extremely focused on providing the best possible service in the required timescale."

Suffolk Norse

WHY MONITOR YOUR ADBLUE?

Used in conjunction with Triscan Group fuel management software and hardware, our AdBlue monitoring systems ensure that granting drivers authorisation to access fuel, tracking fuel dispensed to each vehicle, managing inventories and recording fleet data, is as simple as filling up and driving away.

Bunded AdBlue tanks

Key specs

- Sizes available from 1,350 L - 15,000 L
- Supplied with a 35 L/MIN AdBlue pump complete with a pulsed output
- Fully bunded construction for protection from leaking and overfilling
- 4m delivery hose and automatic shut off nozzle
- Also available as standalone

AdBlue monitoring systems

Key specs

- Real-time enabled
- Choice of 3G or IP connectivity
- Robust construction
- Connect your existing Triscan Group fuel management system to monitor your AdBlue usage
- Compatible with Triscan Group fuel management software

AdBlue dispensers

Key specs

- 25 L/MIN
- Accurate to at least +/- 1.00%
- Single LCD display
- Pulsed output
- Stainless steel construction
- Integrated totaliser on main display

SPECIFICATION OPTIONS

AdBlue dispenser:

- Second side display
- Stainless steel under-pump plinth
- Galvanised under-pump stool

Bunded AdBlue tank:

- Extra length delivery hose
- Heating and cooling system

Fuel island controllers:

- Compatible with Apollo2™, FuelSafe and Sigma 750
