TRISCAN
SOURCE TO EXHAUST™
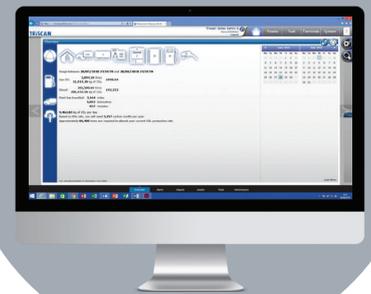

FUEL MANAGEMENT SOFTWARE
ODYSSEY WORLD™

With web-based, real-time capabilities, Odyssey World™ provides the user with central visibility of their entire estate's fuel usage and stocks. Odyssey World™ has been developed in-house by Triscan's experienced development team. Upgrades to future versions are included as part of the licence package.

Benefits

Triscan's Odyssey World™ offers a wide range of benefits:

- Account for every drop of fuel with full audit trail
- Advanced usage, exception and environmental reporting
- View CO_2 and fuel savings by kg, L and £
- Hosted via Rackspace
- Diagnostics and technical assistance over the telephone available from 06:00 to 22:00, 7 days a week, excluding bank holidays

CARBON TRUST STANDARD REDUCING CO2 YEAR ON YEAR | SafeContractor APPROVED | THE BRITISH ASSESSMENT BUREAU ISO9001 | PEIMF | apea working for a safe environment | RHA | FORS FLEET OPERATOR RECOGNITION SCHEME ID:A00295

How does it work?

Data is presented in a series of dashboards, offering a history of vehicle information and odometer readings for an entire fleet. Numerous concurrent users can be nominated and authorised access. The software allows detailed reporting of usage, stock, performance and trends.

Overview

Odyssey World™

Key specs

- Real time fuel management via OLA
- Cost centre and custom vehicle grouping
- Web-based, password protected, and supports multiple concurrent users
- Re-order and low level stock warnings

Reporting

Key specs

- Schedule reports to be emailed to users on a set date, time and / or frequency
- Comprehensive user audit log
- Custom reporting available
- Can be filtered by one or multiple criteria such as: vehicle, driver, depot, cost centre and many more

Secure web hosting

Key specs

- Odyssey World™ is hosted via Rackspace, an enhanced security platform with a managed dedicated server hosted in the UK
- 100% Network uptime guarantee*
- ISO 27001 accredited data centre

Stamp out fuel theft:

- Account for every drop of fuel with full audit trail
- Record invalid attempts to access fuel by unauthorised IDs
- Set fuel limits by vehicle
- Enable alerts when pumps are disabled
- Review low tank stock alerts
- Access advanced vehicle exception reports

Cut fuel costs and CO_2 output:

- View CO_2 and fuel savings by kg, L and £
- View CO_2 output, low stock levels and tree ofset
- Calculate vehicle MPG
- View a daily, monthly or annual average fuel usage report

Key features

- Real-time enabled to control access to fuel (if connected to a Triscan Apollo2™ or ApolloR2 fuel management system)
- Reports can be saved in a number of formats including: XML, CSV, PDF, MHTML, Excel, TIFF and Word
- Reorder and low level stock warnings can be setup - with these alerts being presented within the management dashboard or emailed to users
- Live stock level monitoring available, enabling fuel stock to be managed at a central or local level
- Alternative fuel vehicle management available (dual fuel, LNG, CNG & H)
